New York, NY (Sep 2026) | nelsonkuo0430@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

Columbia University

New York, NY

Master of Science in Artificial Intelligence, AI Infrastructure Concentration

Sep 2026 – Dec 2027 (Expected)

- Fall 2026 Coursework: Heterogeneous Computing (GPU/CUDA), Machine Learning, Artificial Intelligence, Natural Language Processing

National Central University

Taoyuan, Taiwan

Bachelor of Science in Computer Science and Information Engineering

Sep 2023 – Jun 2026

- Honors: Presidential Award (Top 5%) and Dean's Award (Top 10%)

EXPERIENCE

Software Engineering Intern

Jul 2025 – Jun 2026

Garmin

New Taipei City, Taiwan

- Shipped **43 production tickets across 8 APAC markets**, building Java/Spring Boot and Vue.js systems for warranty, POS, returns, and after-sales operations.
- Advanced the refactoring of **3 legacy monoliths** into Spring Boot backends and Vue.js frontends; contributed to a **Java 8-to-21 migration** and expanded JUnit coverage for payment services.
- Drove centralized observability across **9+ services** using ELK, OpenTelemetry, and Sentry, improving cross-service log, trace, and error visibility.
- Built a Warranty Engine from scratch with rule management, simulation, JWT/SSO, and i18n; deployed through Jenkins, Rancher, and Vault.

Engineering Intern

Jul 2024 – Aug 2024

beBit TECH

Taipei, Taiwan

- Analyzed **1M+ purchase records** with Python and pandas; built a scikit-learn revenue forecasting model that improved accuracy by **22%** and presented findings to product managers and supervisors.
- Built a Gemini-powered customer service chatbot using Python, web scraping, and a structured product knowledge base to automate product inquiries.

Research Assistant

Jul 2023 – Jun 2025

Department of Mathematics, National Central University

Taoyuan, Taiwan

- Co-led a 4-person team building a Unity/C# educational math game; designed the software architecture and adaptive AI question-generation system.

PROJECTS

NCU APP | *React, TypeScript, Supabase, Tailwind CSS, Docker*

Mar 2023 – Sep 2025

- Led development of event creation and management workflows for a student-built campus app, improving navigation and usability across core event flows.

TECHNICAL SKILLS

Languages: Java, TypeScript/JavaScript, Python, C/C++, SQL, C#

Backend & Infrastructure: Spring Boot, REST APIs, Docker, Kubernetes, Jenkins, Rancher, Maven, Vault, Apache Airflow

Observability & Data: OpenTelemetry, ELK, Sentry, Redis, MySQL, Oracle, Supabase, pandas, scikit-learn

Frontend: Vue.js, React, Node.js, Tailwind CSS
