EDUCATION

National Central University

Bachelor of Science in Computer Science and Information Engineering

Taoyuan, Taiwan

Sep 2023 – Jun 2026 (expected)

National Central University

Major in Information Management

Taoyuan, Taiwan

Sep 2022 – Jun 2023

- Dean's Award (Top 10% of Class), School of Management, 2023
- Presidential Award (Top 5% of Class), Department of Information Management, Fall & Spring Semesters, Freshman Year

EXPERIENCE

Software Engineering Intern

Garmin

Jul 2025 – Present

New Taipei City, Taiwan

- Maintained and enhanced 8+ B2B backend services for Asian markets; shipped Spring Boot API updates and fixes via Jenkins → Rancher to production.
- Recovered and stabilized a legacy POS dealer Android app (Cordova) after loss of source artifacts—rebuilt the environment, restored missing features, and returned the app to active use.
- Extended and refactored the POS Dealer Management system—delivered self-service capabilities for dealers and established reliable automated test and deployment pipelines.

Research Assistant

Department of Mathematics, National Central University

Jul 2023 – Jun 2025

Taoyuan, Taiwan

- Collaborated with Prof. Tseng from the Department of Mathematics to design and develop an educational math game that engages elementary students and fosters their interest in mathematics.
- Developed using Unity game engine; incorporated AI to dynamically generate math problems tailored to students' individual skill levels.
- Co-led a 4-person team including a planner, an artist, and programmers; responsible for implementing core game features and designing the overall software architecture.

Engineering Intern

beBit TECH

Jul 2024 – Aug 2024

Taipei, Taiwan

- Analyzed over one million customer purchase records using Python and Pandas; identified key product trends and built a revenue prediction model with Scikit-learn that improved forecasting accuracy by 22%. Presented insights to Product Managers and supervisors to support strategic sales decisions.
- Developed an AI-powered customer service chatbot using Python, web scraping, and Google's Gemini LLM; built a comprehensive product database and automated responses, significantly improving service efficiency.

PROJECTS

NCU APP | *React, TypeScript, Supabase, Tailwind CSS, Docker*

Mar 2023 – Present

- Participated in a student-led project developing a campus app to streamline access to essential university services and event information.
- Led the development team in designing and implementing event creation and management features.
- Took initiative to streamline UI design, improving usability and app navigation.

SKILLS

Programming Languages: C/C++, C#, Python, Java, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks: Spring Boot, React, Node.js

Developer Tools: Unity, Git, Docker, Jenkins, Rancher, VS Code, IntelliJ

Libraries: pandas, NumPy, scikit-learn

Languages: Mandarin (native), English (professional), Japanese & Korean (basic proficiency)
